PLOT PLAN  
1" = 100'

**CONSTRUCTION GENERAL PERMIT FOR STORMWATER DISCHARGES ASSOCIATED WITH CONSTRUCTION ACTIVITIES**

This project may require the development of a site specific Erosion Prevention and Sediment Control (EPCS) plan that meets the requirements of the General Permit.

Under the National Pollutant Discharge Elimination System (NPDES) and the Clean Water Act, construction projects involving 1 or more acres of land disturbance require a permit for the discharge of stormwater from the construction activities.

**WETLAND NOTES**

- A site visit was conducted on 10/31/12 by Alan Quackenbush, Section Chief, State Wetlands Coordinator from the Vermont Watershed Management Division. Mr. Quackenbush reviewed the approx. wetland location (as depicted on plan) and determined it to be a "Class 3" wetland.
- All wetlands (Class 2 and Class 3) are protected by the U.S. Army Corps of Engineers. Work within the wetlands is subject to their jurisdiction.

**BOUNDARY NOTES**

- The property lines, easements, and other real property descriptions provided in this permit application are for the use of the AWR only. They do not delete legal rights or meet legal requirements for a land survey as described in 26 V.S.A. §2502(d), and shall not be used in lieu of a survey as the basis of any land transfer or establishment of any property right.
- Approximate boundaries are depicted per corner, dead description and plat(s) of record. The property may be subject to other easements of record (utilities, parking & right-of-way).
- Contact a licensed land surveyor as necessary to verify boundaries.
